JAMES D. ROBINSON,
Secretary and Treas.
Victoria, June 26th, 1875. je26

Political.

Gentlemen Electors of Lillooet District.

YOUR PRESENT REPRESENTATIVES to the Provincial Parliament having served their term, you will be called on to elect two others to represent the district for the next four years. Gentlemen, I think that you will agree with me that a change in your representation will undoubtedly benefit the district, I therefore offer myself as a candidate for the representation of your district in the next Parliament, and pledge myself, if elected, to serve you in truth and honesty and to the best of my ability, leaving no stone unturned in trying to secure the welfare and interests of the district and country in general. Being a comparative stranger to some of the electors I feel it my duty, as far as this notice will allow, to acquaint them with my reasons for soliciting their suffrages. Being a Nova Scotian by birth and bred, as it were, under Responsible Government, and knowing and feeling that Responsible Government, when honestly and justly administered, is the best Government yet given to a people. Having spent the last 23 years in traveling through California, Australia, New Zealand and British Columbia—the last 14 years spent here, and having seen and felt the evil effects of an arbitary Government, I therefore feel that experience has taught me which is the best Government. I am therefore prepared to uphold a Government who will give no monopolies in forest, field, mines or fisheries, who will equalize taxation, economize the treasury, immediately survey the public lands, give free grants to actual settlers, and a just franchise to all British subjects, seek indemnification for nonfulfillment of Terms of Union in regard to railroad through British Columbia, and legislate so as to remove all obstacles on our part to the commencement end completion of the railroad through British Columbia. Gentlemen, these are some of the subjects that direct legislation, and you must send men who are determined to see the evils which now crush the country remedied as soon as possible. Gentlemen, if you think I am worthy and capable of representing you in Parliament and do me the honor to accept my services, and elect me as your representative, I can assure you your confidence will not be misplaced.

I therefore beg to remain yours to command,
je15 6w JOHN E. LORD, Lillooet.

Ayer's Hair Vigor

FOR RESTORING GREY HAIR

TO ITS NATURAL VITALITY & COLOR

Advancing years, sickness, care, disappointment, and hereditary disposition, all turn the hair gray, and either of them incline it to shed prematurely.

AYER'S HAIR VIGOR, by long and extensive use, has proven that it stops the falling of the hair immediately; often renews the growth, and always surely restores its color, when faded or gray. It stimulates the nutritive organs to healthy activity, and preserves both the hair and its beauty. Thus brashy, weak or sickly hair becomes glossy, pliable and strengthened; lost hair regrows with lively expression; falling hair is checked and stabilished; thin hair thickens; and faded or gray hair resume their original color. Its operation is sure and harmless. It cures dandruff, heals all humors, and keeps the scalp cool, clean and soft—under which conditions diseases of the scalp are impossible.

As a dressing for ladies' hair, the VIGOR is prized for its grateful and agreeable perfume, and valued for the soft lustre and richness of tone it imparts.

PREPARED BY

Daily British Colonist.

THURSDAY MORNING, JULY 1st, 1875.

L. P. FISHER, 20 and 21 New Merchants' Exchange is our authorized Agent in San Francisco.

Canada Lends British Columbia $900,000!

On the authority of a private telegram from Ottawa, dated Tuesday, we are permitted to state that the Government of Canada has consented to loan the Government of British Columbia the sum of $900,000 for public improvements, and that about one-fourth of that large sum has been already advanced. The conditions on which the loan has been obtained is not stated; but it is supposed that it is made with the expressed or implied understanding that the new terms shall be recast and railway work further delayed. Whether this be so or not, Canada has now got poor British Columbia in golden chains and the country need not be surprised if she should make her own terms with this Government. Last week the organ of the Local Government transcended the bounds of common decency in applying abusive epithets towards Mr. Mackenzie. It called on the Province to declare the Union dissolved and implored the people not to place the least dependence on Mr. Mackenzie's or Mr. Blake's word. From the telegram we have quoted it will be seen that at the very moment the passionate appeal was published the Local Government were engaged in placing the Province in the power of the very men the organ was so hotly denouncing. If the characters of Mr. Mackenzie and Mr. Blake have been correctly painted by our contemporary, then, indeed, is British Columbia undone!

Legal Botchery.

The meddling and muddling disposition of the Attorney-General in the matter of the Voters' Lists is already sufficiently notorious. He would not let enough alone, and as a consequence of his interference he disfranchised one-third of the civilized voters and enfranchised some 2000 Siwashes and half-a-thousand Chinese. Judge Gray has recently had another Act before him and has found it to present a jumble so extraordinary that he was unable to make any order under it. The Act in question was the new Liquor License Act, and the learned Judge appears to have had no hesitation in declaring at least one of the sections inoperative. No doubt had his attention been directed to other sections he would have been forced to the same conclusion. With these frequent failures of the statutes passed by the Local Legislature, it is no wonder people are beginning to ask whether there is any necessity for an Attorney General at all? Surely, when the country is taxed $4,000 a year and travelling expenses for an Attorney-General it ought to have it laws drawn up in a presentable shape. One of these days there will be a tremendous failure of justice through the loose wording of a local statute, and then there will be heard such a howl of popular indignation as will cause the author of the legal botchwork to start out of his seat. The public have not forgotten the celebrated Quesnel River Ferry Monopoly, which was so neatly upset by the Chief Justice. That was a water privilege, however; and very little astonishment was expressed at the failure of the Attorney-General to comprehend a question involving a water-right. But people really had reason to hope he would not be caught tripping when the subject to be dealt with was liquor.

The Indian Embroglio at Cowichan.

COWICHAN, June 23, 1875.

EDITOR COLONIST:—If the Superintendent of Police would pay Cowichan a visit he would have an opportunity of distinguishing himself and earning his spurs, as the Indians are very drunken and saucy. Last Tuesday week some drunken Indians amused themselves by riding their horses at full speed along the public highway. The Siwashes were in a state of nudity and yelled like demons. It was unsafe for anyone to pass along the road, as they had no control of their horses. But don't send Mr. Todd with written instructions "not to get into a personal rencontre," as Mr. Sullivan had when he came to put the Indians off Munro's land, as they profess to be willing to fight; in fact, blue moulding for want of a beating. And the longer they are allowed to put the law at defiance with impunity the more trouble there will be in quelling them. When the magistrate went and told them to leave the land they were trespassing on they coolly told him he was drunk, although the gentleman was perfectly sober. A few months ago one of our most respectable settlers, while riding quietly home, was accosted by a drunken Siwash and told that he (the Indian) was going to shoot him or some of his family, not because he had any ill will to them, but that he wanted to kill somebody, and that the settler's house was near to him. The gentleman after warning the Indian's tillicums, rode home, put his wife and little ones in the house, and sat down under his verandah, breech-loading rifle in hand, prepared to blaze away when the enemy hove in sight. The Indian went to the ranch, got his musket, and started on the war-path. At the settler's fence, but a short distance from the house, he met another Indian, at whom he levelled his musket, and only that it snapped one more Siwash would have gone to the "happy hunting grounds of his fathers." Owing to the scrimmage that ensued, my friend fortunately did not require to use his rifle. How soon may some drunken Siwash again wish to run-a-muck, and perhaps meet some helpless white woman or child? The idea makes my blood run cold from what I know of Indian cruelty. Who will be responsible? whose duty is it to protect our wives and little ones, and our lives and property? are we to be butchered for an Indian's drunken whim? Tell me, Mr. Attorney-General, is it not your duty to prosecute, afford protection and make the law a terror to evil-doers? Is this your smartness that allows our once peaceable and still peacable Cowichan Indians (if properly managed) to put police, laws and magistrates at defiance? Owing to your (not our) quarrel with the Dominion Government, I am told the Indian Commissioner refuses to take charge of the reserves.

In the present critical state of affairs with the natives, and not knowing how soon we may be involved in the horrors of war, the Ministry at once ought to have laid before the Legislature their policy (if they have got one), prepared to stand or fall by it. But was this embroglio too much, even for a Booth, and the "Silent Brigade?" Why such low, petty intrigues to baffle the Committee on Indian Affairs, so well exposed by our senior member? Were the correspondence and evidence so damning against the Ministry that they had to be kept back at all hazards from public? We, who run the risk of this wretched bungling, if not worse, are branded as repudiators, and compared to American filibusters by the English press, because Walkem & Co.'s poor, contracted understandings deal in little schemes, which dishonour them if they fail, and do them no credit if they succeed. We are not fools to be deceived by misrepresentations of

> "Some slanderous tool of State,
> Some taunting, dull, unmannered deputy,"

Who publishes all the trash that the Tory papers of Ontario and Quebec write about the Dominion Government and the glorious old Reformers of Canada. "In vain does slander pour her slime." The human and enlightened Indian policy of the Canadian Government has been long held up to the admiration of the civilized world.

Who will be ridiculous enough to compare the tried integrity and honour of Mr. Mackenzie with the *chaste and temporate* Walkem, the *large hearted, liberal* Beaven, or that able financier, the *learned and scholarly* Armstrong? I have already trespassed too much, Mr. Editor, on your space, but with your permission I may yet expose some more of our rulers' work.

MARCELLUS.

Municipal Council Chambers, Victoria, June 1, 1875. je1

CORPORATION OF THE CITY VICTORIA,

PROVINCE OF BRITISH COLUMBIA.

I AM AUTHORIZED BY THE MAYOR AND Council of the City of Victoria to offer for public subscription **$50,000** additional Debenture Bonds of the City of Victoria, bearing interest at the rate of Seven per cent. per annum, created in pursuance of the Acts of Parliament, The Corporation of Victoria Water Works Act, 1873, and the Water Works Amendment Act, 1875.

These Bonds are payable to bearer and are secured by endorsement of the Provincial Government and form a lien or charge on the General Revenue of the Province of British Columbia and are a first charge on the General Revenue and the whole of the property of the City of Victoria.

The interest on the bonds will be payable half-yearly by coupons annexed.

The Principal is payable in Victoria at the expiration of twenty years, and a Sinking Fund will be annually set apart by the Corporation to redeem the Bonds, as provided by the Acts of Parliament.

Applications for the **$50,000,** or any part thereof, in sums not less than **$100,** must be made to the undersigned before 4 p.m, of the 19th inst.

Copies of the Act and any further information can be had on application.

Daily British Colonist.

THURSDAY MORNING, JULY 1st, 1875.

THE BRITISH COLONIST

Is the only Paper Published at Victoria that receives Regular Telegraphic Dispatches.

New Westminster District.

[Herald.]

The river is falling.

Miss McWha, the very efficient lady teacher of the New Westminster Public School, has resigned.

The N. W. Branch Bible Society has received a donation of $300 from the Upper Canada Bible Society.

The Herald is to be tried for libel next Monday.

Twenty or thirty new settlers have taken up claims at Chiliwhack within the past month.

A little fellow, son of Dr. McInnes, met with a painful accident yesterday. He was in Mr. Cunningham's store with his cousin Mr. Curtis, and made his way up the steps to the storeroom over the shop. At the head of the steps he lost his balance in some way, and fell to the floor, fracturing the main bone of the forearm, just below the elbow. The little fellow bore the hurt and the subsequent operation with remarkable pluck, his only trouble appearing to be a fear that his arm would not get strong again to enable him to take vengeance on the man that made those steps.

On Monday, His Worship the Mayor went out, by appointment, to meet Admiral Cochrane, and arrange for the ball to be given on board. We believe that event will come off next Tuesday evening. A number of gentlemen also went out on Monday to be present at the firing of the salute in honor of Her Majesty's Coronation. The ship was dressed out in holiday attire, and the salute was fired with the usual honors.

MOODYVILLE, June 28.—Saturday afternoon, the residents of Burrard Inlet were charmed by the sight of the flagship Repulse steaming up towards the centre of our magnificent harbor. Instantly the flags from the various ships went up, and on moved the man-of-war, dropping her anchor just a little above the Hastings Hotel. On Sunday morning a small steam launch with two large boats were sent over, one to Moodyville and the other to Hastings Mill, with a general invitation for all inclined to come on board to morning service, to do so. As many accepted the invitation as could possibly do so. The Rev. Mr. Sutton conducted the service, the band of the ship leading the singing in fine style. The sermon was short but excellent. All the visitors had time to see the ship before the boats returned, and it were worse than useless to try to describe the politeness and courtesy of all on board to the visitors. Everything goes like clockwork and out of 450 men there is not one but knows his place.

Mill shut down at present, undergoing some slight repairs.

[Guardian.]

Salmon are running in large numbers.

Mr. R. Dickinson supplies the Repulse with beef.

A grand ball will be given on board H. M. S. Repulse on Tuesday evening next.

200,000 feet of Challenger's logs were recovered.

The steamer Ada, with a boom of logs from Stave River, in leaving the North Arm a few days ago, encountered a stiff breeze with a very high sea, and was compelled to throw off the boom, which was anchored in the bight this side of Point Gray. She came in contact with some obstacle and knocked over her smoke stack. She was last heard of at Moody's Mills all right, and will probably return to pick up the logs when the weather moderates.

The Wagon Road.

Special to the Colonist.

YALE, June 30th.

The road is dry, but much broken. On Sunday last 20 Indians were sent out from Yale with the mails and express to Boston Bar, where the stage had to remain owing to high water in the canons and the danger of one of the bridges being carried away.

Nanaimo Lighthouse.

A telegram dated Ottawa, yesterday, from the Minister of Marine and Fisheries to Hon. Arthur Bunster, states that Mr. Baker, the contractor for the Nanaimo lighthouse, is on the way to British Columbia.

CONDITION OF THE WAGON-ROAD.—The Chilliwhack correspondent of the *Guardian*, writing on the 20th June, says:—"Our position is rather an awkward one, in consequence of the removal of our bridges and the inundation of our roads, but beyond this I don't know of any damage. The McGillivray bridge fell first victim to old Father Fraser; it seems he is no respecter of persons. It was built a few months ago by George R. Ashwwell at a cost to the Municipality of near $800—it crossed the Hope Slough—an arm of the Fraser, and was to all appearance a very substantial piece of work. But unfortunately it was the wrong style of bridge for the place. All the culverts, bridges and corduroying on the main road, from Vedder Mountain to Cheam Bluff, floated, except the Chilliwhack, Luc-cu-cuck and Elk creek bridges, and on McIntosh's section, round Sumass Mountain, the road is submerged in places from six to thirty inches. The logs which were cleared from the base of the mountain at the time of its construction have floated on to the road, and in some instances have played the part of rams to batter down the telegraph poles."

REFORM CONNENTION.—Lillooet District is about to hold a Convention at Clinton. The basis on which delegates will be elected is as follows: "Allowing for every ten votes, and part of ten, one delegate each, (that is to say) a division having less than ten votes is entitled to three delegates, who are to be fully authorized to represent this division in Convention, those who do not attend are entitled to the full number of votes; or, those delegates who may not be able to attend, can, if they see fit, vote by proxy."

OUTSIDE.—The bark Harvest Home, laden with 321,000 feet of lumber, is outside. She will sail on Monday for Valparaiso.

Municipal Council.

WEDNESDAY, June 30.

Council met at 8 o'clock, the Mayor presiding.

Present—Couns. Gowen, Gerow, Williams, Walker, Gosnell and Shakespeare.

COMMUNICATIONS.

From E. F. Fletcher, enclosing copy of an extract from the minutes of a meeting of the B. C. Rifle Association held on the 29th inst., stating that they would hold a meeting at which prizes would be shot for in September next, and that they would be glad if the Council would appoint a prize to be shot for. Laid over for one week.

From Inspector Bowden respecting the Chinaman complained of by Mr. Meldrum, to the effect that the Chinaman lived on a spare lot rented to him by Mr. Heisterman at $1 50 per month; that he supported himself by raising ducks and chickens and selling wood; that he had lost his nose, fingers, &c., by frost bite at Cariboo, but although rendered a repulsive object by his misfortunes his house and surroundings were cleanly. Filed.

From the City Surveyor, enclosing estimates of the expense of grading Fisguard street, from between Douglas and Government streets, and estimate of cost of sidewalk on north side of Johnson st.

It was also stated that Mr. Preece had finished laying the waterpipes to the north side of the bridge crossing the wamp at Swan Lake, and the bridge at the same point would soon be finished by Mr. Kennedy, the contractor. Mr. Watson was going on satisfactorily with work in town. Filed.

FINANCE.

Gas to street lamps, $131 25; gas to Council Chambers, $6 75; Moody, Nelson & Co., March 27th to June 29th, $110 69; labor on streets, $110 50; T. Lakin, $32; W. Bond, box drain on Fort street, $156; W. Bond, blasting on Pioneer street; $163 68; A. E. Mordaunt, $15; Dr. McN. Jones, certificate, Mrs. Eastman, $10; Dr. Matthews, sundries, $27 50; J. H. Drake, $5, P. Ripper, $13 67. In the course of some explanation on the Doctors bills, the Mayor said that Captain Sholl had agreed to pay $4 towards the expense of having the steamer boarded by a health officer when she came in. The accounts took the usual course.

The Poundkeeper's report was read for the month of June, showing the receipts for fees and feed to be $11.

DEFERRED BUSINESS.

On motion of Coun. Gerow it was decided to grant the sum of $125 to the old water company as compensation for the promptitude shown by them in filling the cisterns after the late fire.

The Mayor drew the attention of the Council to the dangerous condition of the building on Yates street occupied by Muirhead & Co., and the City Clerk was ordered to notify the owners of the house to remove or repair the same.

The Mayor drew attention to the condition of the sidewalk near Mr. Bunster's and on both sides of Pandora street, between Douglas and Blanchard. The Clerk was instructed to notify property owners to repair the same.

Considerable discussion took place respecting the sidewalks on the north side of Johnson street. The Clerk was at length ordered to notify the property owners there to repair and lower the sidewalk to the proper grade between Store street and the Ferry.

On motion of Coun. Gosnell the Surveyor was ordered to prepare an estimate of the cost of a box drain on Cormorant street, from Government to Store. In the course of the discussion of this motion Coun. Williams proposed to put all Chinese washermen out of the city limits.

CITY HALL.

Coun. Gosnell introduced the City Hall question and moved that the Council should advertise for designs for a hall; they could build one wing at a time. It was high time that they were out of the rickety old shed they had to meet in now.

Coun. Walker said that Coun. Trounce was absent, and they ought to have a full board to decide a question like this.

Coun. Gowen said they could not build the hall without borrowing money, and it would be necessary to pass a bylaw to do that and submit the whole question to the people.

Coun. Williams thought there was plenty of money with a revenue of $60,000 or $65,000 a year.

Coun. Shakespeare did not believe in building the hall without the market.

Coun. Walker thought nearly all the $65,000 would be required for works in progress, and it would be better to be sure about this before going into any greater expense. (Voice from the audience—Hear, hear.)

On motion of Couns. Shakespeare and Walker the question was deferred.

Tenders were opened for the grave lling of Superior and Quebec streets as follows: Strong, $1475; C. M Davies, $775; G. Stelly, $1135; W. Baker, $850

Owing to some difference of opinion respecting the feasibility of obtaining gravel on James Bay the tenders were laid over for a week.

The box drain, from the corner of Yates and Douglas street, along Douglas to Johnson and down that street, was awarded to Anderson at 95 cts. a foot.

The Chief Engineer was requested to attend to a dangerous chimney on Fort street, above the Market Exchange, and inform the owner that he would be summoned if he did not alter it.

Council adjourned.

Municipal Police Court.

WEDNESDAY, June 30.

Johnny, a Fort Rupert Indian, was brought up on remand charged with stealing a shawl, value $6 50 from a Klootchman named "Kitty" Prisoner, through his counsel, Mr. Courtney, pleaded guilty to having the shawl in his possession, but stated that he and complainant were all drunk, and he did not know how he came by it. Prosecutor, not wishing to press the charge and nothing being known against prisoner previously, he was sent to prison for two days.

DENIED.—The *Herald* denies that the Superintendent of Education has been guilty of making political speeches to school-chidren. The Superintendent, it would appear, merely referred to a certain disgraceful episode in the career of the Walkem Ministry to "point a moral and adorn a tale" which he related for the edification of the scholars. No harm done.

THE OTTER will not sail until next Tuesday morning.

Inquest.

At 1 o'clock yesterday afternoon Hon. A. F. Pemberton held an inquest upon the body of Edward Butler, who was found dead in an outhouse on the alley between Johnson and Cormorant streets. The following gentlemen, P. Boudot, Wm. Nugent, P. Driscoll, T. McGovern, John Johnson and Geo. Logan, having been empannelled as a jury, and Mr. Johnson chosen foreman, went over to view the body, which was lying on its back in an outhouse in the alley aforesaid, the building being situated at the bottom of a short flight of rickety steps. The corpse was partially undressed and appeared to have been bleeding at the nose. The jury having been duly sworn,

Mr. G. C. Keays deposed that while working in his shop very early yesterday morning, an Indian beckoned to him and said that a Boston man was dead. He went with the Indian and saw the body and informed the Police. The man's boots were off when he saw the corpse first and were lying close to deceased's feet.

Dr. Helmcken deposed that Inspector Bowden took him to see the body and he (Dr. Helmcken) recognized it as that of a patient of his from the Sound. The deceased had complained of dyspepsia and palpitation of the heart. The Doctor had seen him last on Tuesday morning, when he said he felt quite well and intended to go home to the Sound on Friday next; was not aware that deceased labored under any other diseases than those named; could not assign any cause of death without a post mortem examination; had not looked closely for marks of violence on the deceased, as the body was not allowed to be handled or moved until it had been seen by the jury.

This closed the evidence for the present and the inquiry was adjourned till 1 p. m. on Friday to give time for a post mortem examination.

ACCIDENT.—Yesterday a spirited horse while tied up to the verandah post of the Albion House dry goods store, gazed intently on several bunches of beautiful artificial flowers and grasses on display in the show window. Thoughts of succulent pasture and a desire for liberty entered the equine mind, and caused a succession of tugs which carried a couple of verandah posts and a large awning into the middle of Government street. No serious damage took place. The flowers escaped and are now on view.

RESIGNATION.—We regret to learn that Miss MacWha has sent in to the trustees her resignation as teacher in the Public School. Miss MacWha has taught in the girls department for the past 12 months and has proved herself here as elsewhere to be an efficient and painstaking teacher. At the late examination strong testimony was borne to the thorough and successful manner in which she has discharged her duties.—*N. W. Herald.*

THE LUNATIC ASYLUM.—The contract for constructing the Lunatic Asylum at New Westminster has been awarded to Mr. M. Humber of this city for $31,000. The sum voted by the House for the purpose was $15,000. Had the original plan been adhered to the work would have cost something like $40,000; but an L or wing was cut off and the contract awarded at the price stated.

SHIP GARZA.—A telegram from Capt. Hughes, yesterday, to this office, states that he has had the ship Garza docked at San Francisco; her bottom was examined and found to be unhurt. The vessel is pronounced by the surveyors to be nearly as good as new. The Captain appears to have made a great bargain.

HORSES, BUGGIES AND CARRIAGES.—George Francis returned from Portland on Monday bringing five handsome carriage horses for his stables. He has now the finest horses, buggies and carriages in Victoria. The horses are all of good imported stock, and the vehicles are new and substantial. Stables on Trounce Alley nearly opposite the Town Hall. *

THE steamer Enterprise arrived from New Westminster at 3:30 p. m. yesterday with the following passengers: Mr. and Mrs. Green, Mr. and Mrs. Eickoff, Mrs. Irving, Mrs. Ferris, Mrs. Harvey, Mrs. Bell, Capt. Parsons, Capt. Irving, Messrs. T. Charles, Kennedy, Small.

REV. MR. DUNCAN will deliver a lecture at the Pandora street Church, tomorrow evening at 8 o'clock on the Chicago Reformed Episcopal Convention. A most interesting lecture is anticipated, and members of all denominations are cordially invited to be present.

DOMINION DAY.—The Printers' boat race will come off at 10:30 o'clock. At 12:30 p. m. the firemen will meet at their respective engine-houses and march in uniform to Medana's Grove, where their annual picnic will be held.

No PAPER will be issued from this office to morrow, editors and printers having held a meeting and resolved to observe Dominion Day in a loyal manner.

THE REPULSE will not return to Esquimalt until some day next week.

A New Motor.

TWENTY THOUSAND POUNDS OF VAPOR TO THE INCH.

[Correspondence of the New York Times.]

PHILADELPHIA, June 10.—The mechanical and scientific world has been greatly excited of late by the discovery of a new motive power by a John W. Keely of this city. The lately-discovered motor is generated, as the gentleman claims, from cold water and air, and evolves into a vapor more powerful than steam and considerably more economical. It is proposed by this new invention to revolutionize the world and turn machinery topsy-turvy. Steam will be a thing of the past, and the wonderful power of this new creation will supply all the needs of man for the uses to which steam is now applied. Just what this vapor is and how it is made the discoverer refuses to make plain or divulge his hidden secret until he has letters patent taken out in all the countries of the globe which issue patent rights. This service alone will cost about $30,000, and will not be completed until three or four months hence. Mr. Keely is

VERY RETICENT

On the subject of his discovery, and referred your correspondent to his attorney, Charles B. Collier. The latter gentleman said that a private view of the working of the motor had been made on the 10th of November, 1874, before a number of capitalists, and that only three weeks since another exhibition had been given before a number of gentlemen from the New England States. These latter were so well pleased with the modus operandi, and believed so firmly in the ultimate supersedure of steam by the new power, that they formed a stock company, purchased the patent right for the six New England States, and paid $80,000 cash immediately for their share in the invention, and are ready to forward $200,000 more as soon as called upon. They will organize a company with a capital of $3,000,000, and be ready to manufacture the engines and necessary apparatus as soon as the proper patents are secured.

HISTORY OF THE DISCOVERY.

Mr. Keely alleges that the discovery of this power was purely accidental. Up to within a short time he was a poor man, but, having a wonderful degree of natural mechanical skill, he devoted all his time for the past fourteen years to experiments with water, with a view of procuring a motive power from it. He was engaged upon an idea of his own regarding the force of columns of water one day when he accidentally discovered the vapor which he has harnessed. He studied the subject, ascertained how it was generated, learned its power, and thenceforth applied himself solely to the perfection of this idea, working night and day for a number of years, until his efforts were crowned with success. The apparatus by which this power is made is termed a "generator" or "multiplicator," and the vapor is then passed into a "receiver," and from thence to the cylinder box of the engine, where it drives the piston and sets the engine in motion.

THE "GENERATOR"

Is about three feet high, made of Austrian gun metal, in one solid piece, and will hold about ten or twelve gallons of water. It is four or five inches thick and made to stand the very heavy pressure of 20,000 to 30,000 pounds of vapor to the square inch. The inside is composed of a number of cylindrical chambers, connected by pipes, and furnished with cocks and valves. The "reservoir" is about six inches in diameter and forty inches long, and is connected with the "generator" by a pipe, which is about one inch in circumference on the outside, with a bore of about one-eighth of an inch. Connected with both "generator" and "receiver" is a "standpipe" of brass, about two and a half inches in diameter and three feet high, having a spherical chamber at the bottom, made in two parts, by flanges, and connected to the pipe uniting the "generator" and "reservoir." The vapor generated in the multiplicator is conveyed to the reservoir, which contains numerous pipes, and from there by a "feed-pipe" to the engine. The engine is of peculiar construction, but the inventor claims that the vapor can be attached to any ordinary engine now in use with very slight alterations.

CLAIMS OF THE INVENTOR.

Mr. Keely claims that this apparatus will generate cold vapor from water by mechanical appliances without the use of chemicals. The water used is common river, spring or well water, and does not undergo any previous preparation, a rubber hose from an ordinary hydrant to the generator being used, as a means of conveying the liquid. The peculiarity of this vapor is that it can be used to the best advantage at a pressure of from 20,000 to 30,000 pounds to the square inch. To the mechanical mind this seems impossible. Yet such is the claim of Mr. Keely, and it has been attested that such is the fact by gentlemen who are held to be mechanical experts of the highest grade. Yet with all this immense pressure at his command, the inventor is enabled to control his engine and run it with the same

EASE AND FACILITY

As engines are now run by steam. He has tried the "motor" upon an engine of 20-horse power, and it defied the efforts of all the gentlemen present to stop the fly-wheel. The water used, after it had passed through the "multiplicator," has no perceptible smell or taste, and seems as pure as when it first entered, thus showing conclusively that no secret chemical process is employed to carry out the object designed. The parts of the generator and multiplicator are all made of welded iron of great thickness and strength. The connecting pipes are also small and of great thickness, and are oxidized and planished so as to prevent the force of the vapor escaping through the pores of the metal. Steam could not pass through the connecting pipes which are used on this apparatus, since the bore is only about the dimension of a knitting-needle.

DANGER OF EXPLOSION.

With this immense power at hand one would naturally fear an explosion most disastrous in its results. But such it is claimed cannot be the case, since when the vapor comes in contact with the atmosphere it ceases to expand, and instantly goes back to its original state—namely, air and water; therefore, in this regard, it is less dangerous than either gunpowder or steam. The vapor is thinner than air, and will not cut the metal in escaping or passing through the throttle valve. It cannot be exploded or caused to flame by the application of heat to it. A lighted candle has been held at the mouth of a cock, and the force of the air did not even extinguish the light, and did not have any offensive odor—in fact, none at all was preceptible. The rapidity with which this vapor can be generated is almost inappreciable. "In five seconds," says Mr. Keely, "I can supply 2,000 pounds of vapor to the square inch, and enough to run a train of ten cars from Philadelphia to New York and return." It seems almost instantaneous, so short is the time consumed. The vapor has a damp, cold feeling. There is not the least noise perceptible in its generation.

TO APPLY THIS MOTOR

To any engine now in use will first require a dispensing of the boiler, as the receiver and generator will take its place; secondly, the fire-box must be removed as a useless adornment; and, thirdly, in locomotives there will be no use for the tender. The power will be supplied to the engine, and the train will move off at any rate of speed which may be desired, provided all that has been claimed for the "motor" does not fail. With a Keely "motor" attached to a steamer, the voyage of the world can be made without coal, but as the action of salt water in producing the vapor has never been tested, it remains to be seen whether or not a vessel would not be obliged to fill up the space occupied by coal-bins with water tanks. Just here the invention appeared most wonderful. It is said that with about an ordinary tumbler of water a 20 horse power engine can be made to run an hour and perform its full service. "Seeing will be believing" in this matter, and the sooner Mr. Keely makes his

FIRST PUBLIC EXHIBITION

Of the invention will the public at large and the world in general come to regard the name of Keely as they do that of Fulton or Watt. Mr. Keely says that the first public exhibition will be upon the Pennsylvania Railroad, when he proposes to take a train from this city to New York and return. He will have the "generator" stationed at West Philadelphia, fill the "receiver," which accompanies the engine, and take vapor enough to draw twenty cars to New York and back. The passage of the train will be silent. There will be no cinders, no escaping steam or dropping of coals to set fire to bridges. The engine will be smaller than those now in use, but will be of greater horse power. He says that the generator can either be carried on the train or left at a depot, according to the wishes of the engineer. It is small and compact and takes up very little room.

FOR STREET CARS,

As a motive power, this invention, it is claimed, will undoubtedly become popular. The cost of the apparatus will range from $500 to $2,500, according to the size and finish desired. It is evident from the character of the gentlemen who are interested in the "Keely Motor Company," and the amount of money they have advanced, that they regard this invention as the wonder of the nineteenth century. They all speak favorably of Mr. Keely's personal integrity and capabilities, and even gone so far as to lift him up from his position of pecuniary embarrassment and purchase and furnish a large house for his home, and pay him large sums of money for his personal expenses. About four millions of dollars are already involved in the success of this new invention.

By Electric Telegraph.

EXCLUSIVE TO THE COLONIST.

LAST NIGHT'S DISPATCHES.

Eastern States.

COUNCIL BLUFFS, Iowa, June 28.—A terrible tornado passed over Woodburn, 40 miles east of this city, last night. A number of residences, business houses, and other buildings were knocked down and great damage done to crops.

DETROIT, Mich., June 28.—In the tornado last night two children were killed and fifteen persons severely wounded; 23 cottages were destroyed and many others slightly injured. The part of the city visited by the tornado was sparsely settled or the loss of life would have been much greater. A citizens' meeting for the relief of the sufferers was called to meet on Wednesday.

NEW YORK, June 28.—Six new indictments have been found against Wm. Tweed, Peter B. Sweeny, Woodward and others, for obtaining money from the City Treasury on false pretences. The amount involved is $600,000.

NEW YORK, June 29.—The "Mark Lane Express" says the market is hardening because of the floods in France, and unfavorable American reports. Northwestern Europe is favored with plenteous rains. Eastern and Southern Europe are suffering from severe droughts. Prospects are favorable to general abundance. Germany and England have the best prospects; Russia, Hungary and France the worst.

PATTERSON, N. Y., June 29.—A fire at the Watson's Bridge-works, at this place, destroyed two large buildings; loss of bridge-works estimated at $165,000. Watson & Co., who occupied rooms on the third floor for the manufacture of silk, lost $40,000. C. N. Morton of New York loses $14,000.

NEW ORLEANS, June 29.—A Brownsville special says a drove of stolen cattle crossed the Rio Colorado near Barclay's Ferry on Saturday night. Rangers and regulars are in pursuit. It is reported that 200 well-armed Americans crossed at Caitora's ranch a few days ago.

BOSTON, June 29.—Geo. W. Pemberton, the murderer of Mrs. Margaret Bingham, has been sentenced to be hanged.

NEW YORK, June 29.—Gold 17⅛ @ 17⅜.

Europe.

DUBLIN, June 29—11 a. m.—There is a large attendance at Dollys Mount to witness the great shooting match between the American and Irish Riflemen. The road leading from the city, to the scene, some 3 miles, was crowded during the morning with people. American and Irish flags were displayed on all sides. The weather is hazy and a high wind is blowing. Noon—The firing began soon after 11 o'clock at the 800 yard range. A detachment of the 50th Regiment acted as markers. Nearly half the shots have now been fired, but so close are the scores it is impossible to ascertain the result. At the present writing both sides are doing fine work, and nearly all the shots are bull's eyes. One p. m.—The firing at the 1,000 yard range is in favor of the Irish team. Americans, 337; Irish, 338. Two p. m.—The teams are now firing at the 900 yard range—28 out of 90 shots being fired by each, and the Americans are 12 points ahead. The Americans won the rifle match by a score of 957 to 929. At the 1,000 yards range the Americans were 4 ahead. The shooting at 1,000 yards range, which was remarkably fine on both sides, was won by the Americans by a score of 303 against 299. The victory of the American marksmen was hailed with tremendous enthusiasm.

Ayer's Sarsaparilla,

FOR PURIFYING THE BLOOD.

This compound of the vegetable alteratives, Sarsaparilla, Dock, Stillingia and Mandrake with the Iodides of Potassium and Iron makes a most effectual cure of a series of complaints which are very prevalent and afflicting. It purifies the blood, purges out the lurking humors in the system, that undermine health and settle into troublesome disorders. Eruptions of the skin are the appearance on the surface of humors that should be expelled from the blood. Internal derangements are the determination of the same humors to some internal organ, or organs, whose action they derange, and whose substance they disease and destroy. AYER'S SARSAPARILLA expels these humors from the bleod. When they are gone, the disorders they produce disappear, such as Ulcerations of the Liver, Stomach, Kidney, Lungs, Eruptions and Eruptive Diseases of the Skin, St. Anthony's Fire, Rose or Erysipelas, Pistules, Blotches, Boils, Tumors, Tetter and Salt Rheum, Scald Head, Ringworm, Ulcers and Sores, Rheumatism, Neuralgia, Pain in the Bones, Side and head, Female Weakness, Sterility, Leucorrhea arising from internal ulceration and uterine Dropsy, Dyspepsia, Emaciation and General Debility. With their departure health returns.

FRENCH MEDICINES

PREPARED BY

GRIMAULT & CO.,

PHARMACEUTICAL CHEMISTS,

8, RUE VIVIENNE,

PARIS.

OF all the medicines offered to the public for many years past, none have met with such favorable reception, or been so generally approved by the Medical Profession, as those prepared by Grimault and Co.

The model laboratories of this firm, situated at Neuilly-sur-Seine, and managed by Dr. Leconte, Professor in the Faculty of Medicine, ex-Pharmacist of the Hospitals of Paris, and formerly Assistant of Dr. Claude Bernard, Professor of Physiology at the College of France, offer guarantees to be found in no other establishment.

NURSING---PREGNANCY---EXHAUSTION.

Busart's Lactophosphate of Lime Preparations.

The preparations having Lactophosphate of Lime at their base, known as Dusart's Wine and Syrup are the most valuable tonic restoratives known. They promote the formation and the nutrition of tissues, render nurses' milk more rich and plentiful, and aid the formation of the infant during pregnancy. They stimulate the appetite, agree with feeble persons, convalescents, old people, and especially with children to counteract the tendency to rickets.

GRIMAULT & CO'S

Syrup of Hypophosphite of Lime.

An excellent remedy for all affections of the chest; it relieves coughs, effectually prevents nocturnal perspiration, and restores the patient's strength. This syrup is the only one which, ever since 1857, has invariably been attended with satisfactory results—a fact due to the purity of the hypophosphite employed. Be sure to observe that it bears the signature of Grimault and Co., on bottles of an oval shape, the syrup being always of a rose colour.

GRIMAULT & CO'S

Matico Injection and Capsules.

Composed of the essence extracted from the plant so called, they have been constantly employed with the most brilliant success in a certain class of contagious disease.

They combine extraordinary efficacy with the advantage of never causing nausea, eructations, or pains in the stomach, as do the gelatinous capsules which contain Balsam of Copahu in a liquid state; or the strictures which result from the use of injections having a metalic basis.

Victoria, June 1, 1875. je1

NOTICE TO MARINERS.

No. 4 of 1875.

POINT ATKINSON REVOLVING LIGHT.

Notice is hereby given that a Lighthouse has been erected by the Government of Canada on Point Atkinson, at the north westerly entrance to English Bay and Burrard Inlet in the Straits of Georgia, British Columbia.

Latitude 49 deg. 19 min. 42 sec. N.

Longitude 123 deg. 15 min. 54 sec. W.

A Revolving White Light on the catoptric principle, elevated 119 feet above high water, will be exhibited on 1st May next. The light will show at intervals of one minute, making a complete revolution in two minutes.

The tower is a square building with dwelling house attached, painted white, elevated 40 feet from summit to centre of Light. The Light will be visible round an arc of the horizon from the entrance to Burrard Inlet to an E. by N. ¼ N. bearing, and should be seen in clear weather 14 or 15 miles distant.

The Light should not be brought to bear to the Eastward of North by vessels in the Straits, as this bearing will only lead clear of Sturgeon Bank off Fraser River.

The Bearings are magnetic.

The Light is for coast purposes and to indicate the entrance to Burrard Inlet.

KEATING'S

BON BONS or WORM TABLETS,

A PURELY VEGETABLE SWEETMEAT, both in appearance and taste, furnishing a most agreeable method of administering the only certain remedy for INTESTINAL or THREAD WORMS. It is a perfectly safe and mild preparation, and is specially adapted for children.

TESTIMONIAL.

"Harpenden, 7th March, 1871.

To Mr. THOMAS KEATING.

"SIR,—My two little girls, aged respectively three and two years, showed symptoms of having worms, so I obtained some of your Worm Bon Bons from Mr. Bushby, and they effected such a thorough cure—in fact, I think, saved their lives. The elder little girl had sixteen worms come from her. I think it my duty to acquaint you with the fact.

"FRED'K. WILLMOTT."

SOLD IN TINS, BY ALL CHEMISTS AND DRUGGISTS.
